

Iphone Guide

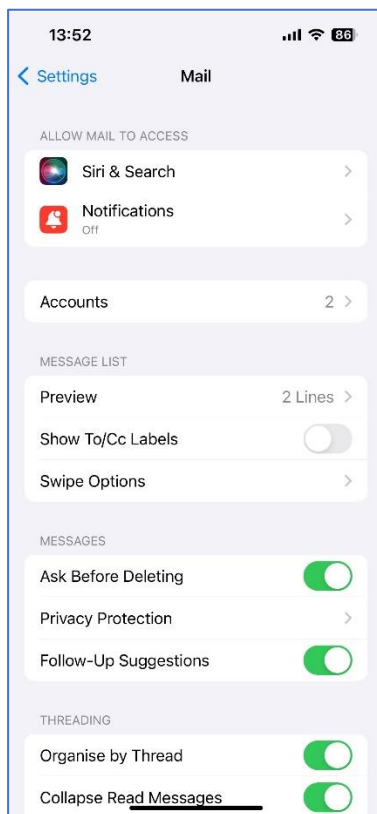

1. **Open Settings:** Unlock your iPhone and locate the Settings app. It's typically found on your home screen, and it looks like a gear icon

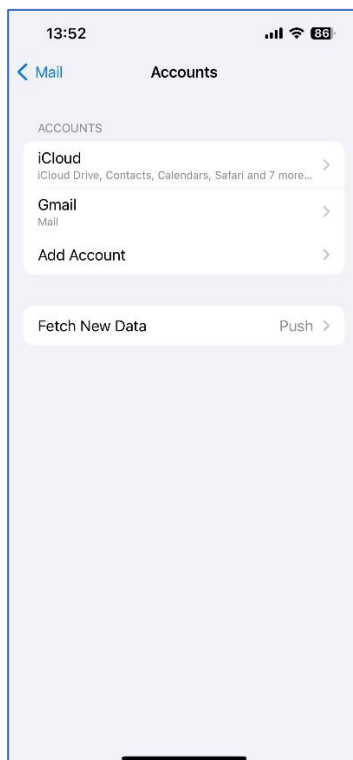

2. **Scroll down and tap on "Mail":** In the Settings menu scroll down, or search for the "Mail" option. Tap on the Mail icon to proceed.

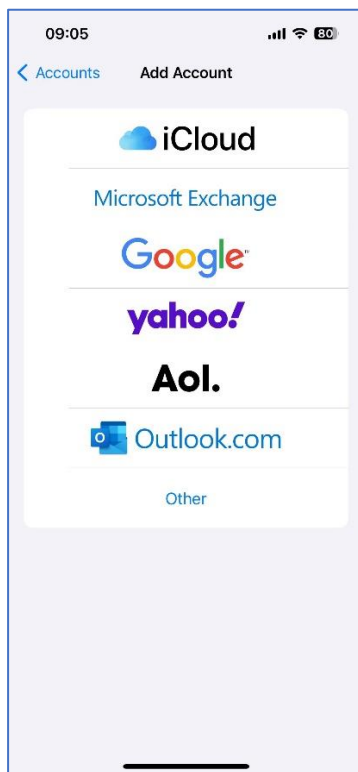

3. **Tap "Accounts":** Within the Mail settings, you'll see various options. Tap on "Accounts" to manage your email accounts.

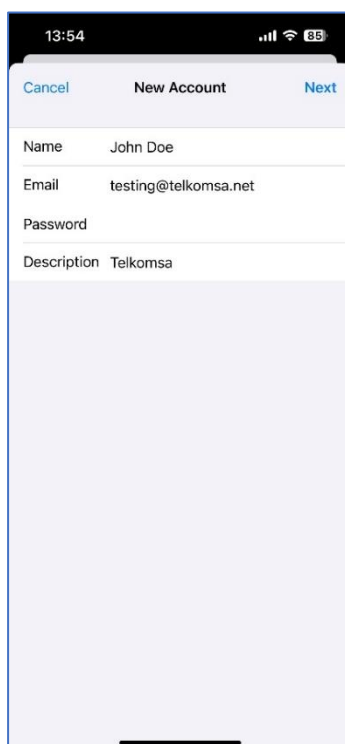

4. **Tap on "Add Account":** Under the Accounts section, tap on "Add Account" to begin adding a new email account to your iPhone

5. **Select your email provider:** You'll see a list of popular email providers like Google, Yahoo, Outlook, etc. Tap on "Other" at the bottom and then "Add Mail Account."

6. **Enter your account information:** You'll be prompted to enter your email address and password associated with the third-party email account you want to add. Fill in the required fields and tap "Next."

7. **Configure settings:** iPhone may automatically configure the settings for your account. If not, you will need to enter additional information such as incoming(pop3.telkomsa.net port 110/imap.telkomsa.net port 143) and outgoing(smtp.telkommsa.net) mail server settings.
